Termite & General Pests

TEMP-VENT®

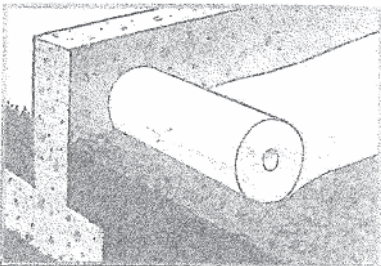

Help Protect Foundations with Temp Vent

The foundation is critical to the integrity of the home. That's why foundation ventilation is critical. Unventilated foundations are subject to build-up moisture that can eventually lead to costly damage.

Temp-Vent foundation vents help control moisture build-up and termites in crawl spaces. Temp-Vent products are designed for and available exclusively through Pest Management operators.

Temp Vent foundation vent systems help protect this critical area of the home. What's more, ventilations can help control conditions that lead to mold, mildew, fungi, damp rot and unhealthy air.

But there's more. If there's one thing termites are attracted to, it's warm, moist, dead air environments such as those found under houses in crawl spaces or unfinished basements. Temp-Vent products have been especially designed for the pest control industry.

VAPO-CHECK *HELP STOP ELEVATED MOISTURE LEVELS*

- Consists of polyethylene sheeting that helps provide a ground barrier to water vapor
- Long lasting
- Resistant to rot, decay, hardening, cracking or peeling
- Helps minimize condensation on windows
- Helps reduce musty odors
- Aids in controlling termites and other wood-destroying insects by reducing wood moisture content.

AT A GLANCE

- Water-soluble borate powder for use as a dust, liquid or foam
- Active ingredient is a borate: Disodium Octaborate Tetrahydrate
- Prevents and controls subterranean termites, wood decay fungi, carpenter ants, old house borers and powderpost beetles.
- Won't discolor or stain wood surfaces
- Won't corrode screws, nails and other components used in construction

A CLOSER LOOK

Tim-bor Professional is an efficient, fast and economical way to treat a structure for target pests. It can be used as a wood preservative, fungicide and insecticide on its own or in conjunction with other treatments as a supplement. Because of its application flexibility as a duster or liquid, PMP's can address many treatment niches with this single product - Tim-bor Professional can be applied as a dust, spray, foam or mist onto wood and cellulose materials or inside wall voids, cracks and crevices.
